## 1. Purpose of the document

The Ranking system calculation document describes the exact process of the International Table Football Confederation (ITFC) ranking point calculation methodology for all three games (12 Touch, Sectorball and Chapas). The document also describes which championships results can be part of the ranking system.

## 2. Ranking system history

The official ITFC ranking system was created in 1993 after its formation. The ranking system was adapted from the Hungarian Federation and was used till 2017. The ranking system calculation was renewed in 2017 for being more optimized for the international needs.

## 3. Calculation method

The new ranking system combines the match results (points) and final tournament results.

The ranking points are calculated based on a predefined table, championship multiplier. Each player who participated in a ITFC tournament will be given with initial 1 point.

Separate ranking table is available for 12 Touch, Sectorball and Chapas game as well.

### 3.2 Calculation details

- Each player receives ranking points based on their final Championship place (Point ranking card)
- The total points obtained during the competition (win: 2, draw: 1, defeat 0) are added to the points given based on the final place. (Won game without a played match does not count into the tournament own points.
- The total points obtained are multiplied by the competition multiplier.
- **Competition multipliers:**
  - ✓ **World Championship:**  
*Championship multiplier: 10*
  - ✓ **European Championship:**  
*Championship multiplier: 7*
  - ✓ **South America Championship:**  
*Championship multiplier: 7*
  - ✓ **Individual Championship Category I:** Players total ranking points > 18000 or priority tournament (Intercontinental Cup, World Cup) or one pre-announced tournament (per country per year):  
*Championship multiplier: 3*
  - ✓ **Individual Championship Category II:** Players total ranking points > 12000 < 18000:  
*Championship Multiplier: 2*
  - ✓ **Individual Championship Category III:** Players total ranking points > 6000 < 12000:  
*Championship Multiplier: 1.5*
  - ✓ **Individual Championship Category IV:** Players total ranking points < 6000:  
*Championship Multiplier: 1*
- Points given based on the final ranking will be revoked as soon the same competition is re-organized, but points earned during the competition will be retained.

Example: At WC 2018, XYZ competitor scored 10 points and finished 4th (80 points) which means player earned 90 points. Competition multiplier is 10, player will get 900 ranking points. After the next World Cup, 900 points will be deducted, and only 10 points retained.

## International Table Football Confederation

- If a competition is not re-organized any more, points will be revoked after 4\* years as described above in point 4.
- In Team competition, only the points earned by individuals will count multiplied with Championship Multiplier.
- After 10 years of inactivity, the player must be removed from the ranking table.
- Each player who plays at least in one ITFC tournament will get 1 starting ranking point.  
\*During pandemic situation, the 4 year can be extended with the pandemic time.

### 4. Ranking system availability
